

PLATES AND INDEX

of the

SILVER COINS

from the

GORDON V DOUBLEDAY COLLECTION
OF COINS OF EDWARD III

sold at Glendining & Co. 7-8 June 1972

All the silver coins in the Doubleday Collection were photographed by the British Numismatic Society with the aid of the Schneider Fund. As the original negatives have been lost these photographs have been prepared from a set of prints.

Plates are numbered in Roman numerals at the top right-hand corner. Lots are identified in the index by the appropriate plate number(s) followed in brackets by the position of the coin(s) on the plate(s). Coins are numbered consecutively from the top left-hand corner of the plates.
